KILL LOGAN BILL.

Measure to Deduct \$300,000,000 of Mortgages From Tax Rolls.

The Logan bill providing for the deduction from the assessed value of mortgaged property of the amount of the mortgaged property of the amount of the mortgage, which instrument is separately listed and taxed in Kansas, has been killed on final passage without formallty in the senate. This proposal, taken in connection with the new registration fee law, would have made a big difference in the taxable valuation of Kansas real estate, for it would have taken off the tax rolls about \$300,000,000 of mortgaged property.

Final consideration of the bill came up during the rush to clear Monday's calendar for a special order and drew a smaller amount of attention than any measure of its importance that has been discussed this session. It lost by a vote of 14 to 20.
